DEPTFORD
MOVING FORWARD

The Wharves Deptford

Project Update & Upcoming Events

Find out more about what is
happening at the Oxestalls Road
site and how to get involved.

The Wharves, Deptford is the mostly industrial site between Evelyn Street, Oxestalls Road, Grove Street and Dragoon Road, in North Deptford.

It is one of Lewisham's key regeneration sites and proposals were developed in 2008 – 2009, alongside community consultation, for new homes, public spaces, employment and community facilities.

This newsletter gives more information about the project and upcoming events, which we hope you will be involved with.

2014 Update

Since the original proposals were developed, the planning process took some time and it was in 2012 they were granted planning permission by Lewisham Council. Most recently (in August 2014) Lend Lease purchased the development rights to the site and will now be taking the project forward.

Given it has been 5 years since the proposals were first developed, the original Architects and Masterplanners Hawkins\Brown will be updating the plans to respond to changes in the wider area and reflect current and future local needs.

Soundings will continue to involve the community over the coming months to help inform this process.

Get Involved

In September, we will hold the first public consultation events to introduce the whole team and share initial ideas for how the scheme could be updated. Please see page 4 for full details of upcoming events.

We will be seeking your feedback which will be shared and discussed directly with Lend Lease and the design team who will develop the scheme updates over the Autumn. We will then return before the end of the year to present the final scheme before it is submitted for planning and provide more information on key issues.

We also hope to re-establish the Community Reference Group that was formed in 2009, made up of local representatives and organisations. The group will meet regularly throughout the process to check the consultation, discuss key-issues in more depth and help identify where there is opportunity for continued involvement beyond the planning submission. Please contact us if you are interested in joining the Community Reference Group.
